

EARTHQUAKE PREPAREDNESS

ESTABLISH COMMUNICATION

With Titan HST you can:

- Send broadcast messages with instructions or protocols
- Request safety status during earthquake drills or real events
- Quickly share evacuation maps, pictures, videos, or documents
- Store site files including evacuation checklists, directions to reunification areas, emergency contacts, & more!

TAKE ACTION

Helping your organization take action requires repetitive drills with your teams. Make it a goal to participate in October's International Great ShakeOut earthquake drill!

TIP OF THE WEEK

A Tip of the Week can be a fun way to keep your team involved in the emergency preparedness process with small, informational messages about your organization's goal achievements or emergency factoids.

PRACTICE MAKES PERFECT

Help your teams develop muscle memory with regular practice of:

- Fire evacuation
- Drop-Cover-Hold On drills
- Reunification assembly
- CPR

KNOW THE HAZARDS

Earthquakes may cause secondary hazards, such as:

- Downed powerlines
- Broken waterlines
- Gas leak
- Road damage
- Tsunamis

DEVELOP A TRAINING PLAN

General training can include:

- Outline of role responsibilities
- Notifications and warning communication responses
- Directions to assembly areas
- Location and use of on-site emergency equipment
- Emergency shutdown procedures for your building or organization

ASSIGN EMERGENCY RESPONSE DUTIES

Does everyone have a responsibility? Basic duties should include:

- How to use a fire extinguisher
- First-aid / stop-the-bleed protocols
- Evacuation procedures
- On-site employee attendance
- Shutdown procedures
- Assembly area and care & shelter procedures

CAN YOU COMMUNICATE EFFECTIVELY?
USE TITAN HST FOR YOUR COMMUNICATIONS NEEDS
